

Pavel Harelyshau

Frontend Developer / pavel@harelyshau.dev / website: harelyshau.dev

SUMMARY

Enthusiastic Software Engineer with over 3.5 years of commercial frontend development experience, adept at utilizing modern technologies and Agile methodologies. Proficient in SAP products, skilled in collaborating with diverse international teams, and experienced in mentoring interns. Adept problem solver who thrives on creating user-friendly applications. Willing to relocate to Canada.

KEY SKILLS

Programming Skills:	JavaScript, ES6, CSS, HTML5, XML, JSON, TypeScript, SQL
Frontend Frameworks:	SAPUI5, OpenUI5, SAP Fiori Elements, Flexible Programming Model
Backend Technologies:	RESTful APIs, XSodata, OData v4 & v2, NodeJS, CDS, XSJS
SAP Ecosystem:	SAP Cloud Application Programming Model, SAP HANA Database, SAP S/4HANA, SAP Business Technology Platform, SAP Cloud Platform
Development Tools:	Git, Visual Studio Code, SAP WebIDE, SAP Business Application Studio, Jenkins, Jira
Design Tools:	Photoshop, Figma
Additional Expertise:	UX/UI Design, Responsive Design, Progressive Web Apps (PWAs), Teaching, Mentoring, Testing

EXPERIENCE

Frontend Developer **July 2022 – Present**
EPAM Systems Inc, Tbilisi, Georgia

- Spearheading frontend development using SAPUI5 & Fiori Elements frameworks
- Contributing to the procurement management module, assisting new developers in project assimilation
- Simultaneously working on two applications, managing tasks effectively to meet project deadlines
- Significantly optimizing the code maintenance by reducing the code base by over 2 times through strategic code refactoring, while retaining full functionality
- Playing a key role in the implementation of dynamic rendering of diverse interface elements based on server metadata

Frontend Developer **February 2021 – June 2022**
JET BI LLC

- Spearheaded frontend development initiatives using SAPUI5 & OpenUI5 frameworks
- Developed a module for holding meetings, comprising 3 UI applications. Optimized application speed by implementing real-time data updates through converting data from the OData model to JSON
- Designed and constructed a module for organizing surveys and tests, encompassing complete data model development and backend implementation using XSJS
- Created custom controls utilized across all company projects, contributing to consistent and efficient development processes
- Acted as a mentor for trainees and played a crucial role in conducting the frontend development course on SAPUI5

Full Stack Developer
WeLoveNoCode Ltd

August 2020 – February 2021

- Spearheaded full stack development efforts using Bubble.io, successfully delivering Minimum Viable Products (MVP) for 4 projects within a tight timeframe
- Orchestrated the development of backend and frontend logic, ensuring seamless functionality and user experience
- Integrated various payment and third-party APIs into applications, enhancing features and user interactions
- Actively engaged in requirements collection from customers and played a pivotal role in the application design process
- Took charge of task assignment to the entire development team, providing daily progress reports to clients, facilitating efficient communication and project management

Frontend Developer
Freelance

February 2020 – August 2020

- Independently developed 7 websites from scratch using CMS
- Designed and prototyped all websites using Photoshop and Figma, ensuring intuitive user interfaces
- Utilized JS, HTML, and CSS for custom development, tailoring solutions to specific client needs
- Significantly improved UX by optimizing website loading speed, achieving a 2x speed increase on average
- Successfully optimized websites for search results, resulting in their appearance on the first pages of relevant search queries

EDUCATION

Minsk Radio Engineering College

Specialization “Software of Information Technologies”, faculty of Computer Technologies

PROFESSIONAL DEVELOPMENT

- Full Stack Development on SAP CAP & SAP Fiori Elements, 2023
- Backend Development on SAP S/4HANA, 2022
- Developing Applications for iOS, 2022
- Frontend Development using SAPUI5, 2021
- Web Development, 2020

ACHIEVEMENTS

- 4 kyu on Codewars (profile: <https://www.codewars.com/users/harelyshau>)
- Champion of Republic of Belarus in Rapid Chess and multiple Champion of the Vitebsk region in Classical Chess
- Made a design for a collection of poems

LANGUAGES

- English – Upper Intermediate
- Russian – Native
